

THOUGHTS OF THE PRESIDENT

On Monday (16th) I met with Willie Kemp who, with the District Equipment, inspected all the "portable" electrical items (all passed) during my time with him I took the opportunity to look around our area. I noted a few small jobs that needed attention

1. Gutters and gullies need clearing of leaves now all have dropped. URGENT
2. White UPVC surrounds of outside windows need cleaning some are starting to go green - hot soapy water should clear this.
3. One of the seats of the PICNIC TABLE has come away, also the tables need treating.
4. The fire-lighting area - the grass around this area is showing distress. The affected area could be enlarged with more concrete slabs.

INSIDE The facing at the bottom of the door to the Brownie cupboard is coming away and needs pinning/glueing to stop further damage

IN THE KITCHEN the area around and under the microwave also the top of the cooker need special cleaning, as does the rest of the room.

In the past I have done these jobs but now feel that these jobs could be tackled by the older boys (under supervision) perhaps during these holidays!!

Isnt there a badge to cover these tasks??
